Tzu Ping Chen

Problem

Existed Solution

- The current solution:
  - Advises from friends
  - Google Search
  - HomeAdvisor.com
  - Yelp

  - "Yelp"-like models still require users to spend time on research and have to contact the contractor by themselves
 - Google only guarantee the quality of the contractors but not responsible for the safety

Problem

- None of these solutions work for me.
  - When my toilet over flowed, I want instant help.

Our Solution

- Save time

- On demand service

- We solve time demand (instant needs)

- By providing online plumbers to struggling customers to fix their home.

Target user

- House owner who don't have time fixing these problem themselves and want to solve the problem immediately

- Female who feel uncomfortable to reach strange contractors

How it works?

Demo

Revenue Model

- From the contractor's side:
  - We will share the 15% fee after the work is done.

- From the user's side:
  - We will post ads on our website page sides.

Future Investment

- Increase jobs covering area

- Provide more specific data and functions on the problem analysis

- Increase number of contractors registered

Thanks
